

ABOUT CONFERENCE

The global challenges of climate change, environmental degradation, and resource scarcity demand innovative and comprehensive solutions. To address these pressing issues, a conference focused on long-term human survival through the implementation of a National Ecosafety System (NES) is being organized. This conference aims to bring together experts, policymakers, industry leaders, and civil society to discuss and formulate strategies for sustainable resource management, environmental protection, and disaster risk reduction. The conference on long-term human survival through a National Ecosafety System is a crucial step towards addressing the environmental challenges facing our world today. Through increased awareness, knowledge sharing, and collective action, we can ensure a healthy, stable, and prosperous future for all

SCOPE

Greater understanding among participants of the critical role of NESS in ensuring long-term human survival and environmental sustainability. This conference is aimed for the formation of networks and partnerships among government agencies, private sector, academia, and civil society to support NESS implementation. Development of actionable policy recommendations and strategies for integrating NESS into national development agendas. Pledges and commitments from participants to take concrete actions towards implementing NESS and promoting environmental sustainability.
