ABOUT CONFERENCE

The global challenges of climate change, environmental degradation, and resource scarcity demand innovative solutions. To address them, a conference on long-term human survival through a National Ecosecurity System (NES) is being organized. It will unite experts, policymakers, industry leaders, and civil society to develop strategies for sustainable resource management, environmental protection, and disaster risk reduction. By raising awareness, sharing knowledge, and promoting collective action, the NES conference marks a vital step toward a healthier, more stable, and prosperous future for all.

SCOPE

The conference seeks to enhance participants' understanding of the critical role of the National Ecosecurity System (NESS) in ensuring long-term human survival and environmental sustainability. It aims to build networks and partnerships among government, private sector, academia, and civil society to support NESS implementation. Key outcomes include actionable policy recommendations for integrating NESS into national development agendas, along with pledges and commitments from participants to take concrete steps toward implementation and the promotion of environmental sustainability.
